The screenshot shows the YaST2@node1 window with the "Heartbeat - Media Configuration" dialog. On the left, there is a help pane titled "Heartbeat Media Configuration" which explains that users can specify the method for internal communication (Broadcast or Multicast) and that multiple media should be configured for redundancy. The main configuration area has "Broadcast" selected with "eth0" as the device. A table below shows a single entry: "bcast" with "eth0" as the option. A warning dialog is displayed in the center, stating: "Warning: No redundancy in the Heartbeat communication channels. Multiple media should be configured to reduce the likelihood of critical split brain scenarios." The dialog has "Continue" and "Cancel" buttons. At the bottom of the main window are "Back", "Abort", and "Next" buttons.

Heartbeat Media Configuration

Heartbeat Medium

Broadcast Device: eth0

Multicast Multicast Group: Device: eth0 TTL: 2

Medium	Options
bcast	eth0

Warning: No redundancy in the Heartbeat communication channels. Multiple media should be configured to reduce the likelihood of critical split brain scenarios.

Linux is a multiuser system. Several different users can be logged in to the system at the same time. To avoid confusion, each user must have a unique identity. Additionally, every user belongs to at least one group.

Use this dialog to get information about existing users and add or modify users.

To shift to the group dialog, select **Groups**.

To create a new user, click **Add**.

To edit or delete an existing user, select one user from the list and click **Edit** or **Delete**.

Users and groups are arranged in various sets. Change the set currently shown in the table with **Set Filter**. Customize your view

User and Group Administration

Users Groups Filter: System Users

Login	Name	UID	Groups
at	Batch Jobs Daemon	25	at
bin	bin	1	bin
daemon	Daemon	2	bin,daemon
ftp	FTP Account	40	ftp
games	Games Account	12	users
gdm	GNOME Display Manager Daemon	50	shadow
hacluster	Heartbeat Processes	90	haclient
haldaemon	User for haldaemon	101	haldaemon
lp	Printing Daemon	4	lp
mail	Mailer Daemon	8	mail
man	Manual Page Viewer	13	man
messagebus	User for D-BUS	100	messagebus
news	News System	9	news
nobody	Nobody	65534	nogroup,nobody

YaST2@node1

Enter the **User's Full Name**, **Username**, and **Password** to assign to this user account.

When entering a password, distinguish between uppercase and lowercase. Passwords should not contain any special characters, such as accented characters.

With the current password encryption (Blowfish), the password length should be between 5 and 72 characters.

Valid password characters are letters, digits, blanks, and #*.,.:_-+!\$%&/?({})=.

To ensure that the password was entered correctly, repeat it exactly in a second field. Do not forget your password.

For the **Username**, use only
