**Printers**  
In this dialog, manage printers on your system.

**Adding a New Configuration**  
Press **Add** and choose to configure connections or queues.

**Deleting, Editing, and Setting as Default**  
Select the printer in the table and press the appropriate button. You can only edit configurations created with YaST. A change of default printer will take effect after the next login.

**Saving Changes**  
Press **Finish** to save changes.

**Discarding Changes**  
Press **Abort** if you do not want to save changes.

### Printer Configuration

Queue Name	Device	Model	Default Queue
CUPS-PDF	/export/share/pdf	Acrobat Distiller	Default

**Adobe Acrobat Distiller / CUPS-PDF**  
Connected As pdf-writer/export/share/pdf/  
With Spool CUPS-PDF
